Core D

January 2010

Viral Request Form / Billing Information

PI Approval:_____ Account #: _____

Please notify via e-mail at least one week in advance of submitting materials to Core for virus production. Ship only via FedEx Priority for morning delivery.

Contact Information:

Date Ordered:__ /__/_____ Date Wanted:___/__/_____ Date Completed:__/__/_____

Name:_____ Telephone.:_____

E-mail:_____

Principle Investigator Lab:_____

Shipping Address: _____

_____

_____

Fed Ex # (to ship completed virus):_____

Billing Address: _____

_____

_____

Cell or Virus Identity:_____

Description of virus or plasmid (including any dangers associated with your insert):_____

_____

Please attach vector / plasmid maps if available.

Provided by requestor: [ ] Seed Virus or [ ] DNA for transfection

(Requestor MUST provide recommendation on cell line to use for all viral preps and titrations. Requestor may be asked to provide cells if they are not available in the Core).

Service Requested:	**Service Fee:**	
	MMCRI	**Non-MMCRI**
Adenovirus Production (>$2x10^{12}$ purified vp)		
[ ] Transfection through large scale purification	$300	$400
[ ] Seed Virus provided by PI, large scale purification	$200	$350
[ ] Viral Cell Pellet provided by PI, virus purification	$125	$225
[ ] TCID50 Titration of Adenovirus	$75	$100
[ ] Retrovirus Production (2x10cm / transfection, harvest, aliquot)	$100	$200
[ ] Retrovirus (large scale 6x10cm / transfection, harvest, aliquot)	$400	$600
[ ] Lentivirus Production (1-2x10cm transfection + harvest)	$150	$200
[ ] Lentivirus Production (1-2x10cm transfection + harvest+conc.)	$200	$250
[ ] Lentivirus (large scale 6x10cm transfection+ harvest+ conc.)	$500	$650
[ ] Lentivirus p24 ELISA titration	$125	$250
By Permission and Appointment Only.		
One week advance request.		
[ ] Use of Core Ultracentrifuge for viral concentration	$25	NA
[ ] Use of Core Rotor and Buckets for viral concentration	$25	NA

Cells Requested:		
[ ] Cell Lines available in stock (Cell Type:_____)	$25/T25 flask	$45/T25 flask
